Cefetra Premium Oils announces strategic partnership with Spack International, assuming exclusive distribution and expanding the company's depth and reach in organic and specialty oils in North America

Aptos, California, August 10th 2026

Cefetra Premium Oils USA Inc., a Cefetra Group company and supplier of organic and specialty plant-based edible oils is excited to announce that it has acquired the exclusive distribution rights and team of Spack International. Spack International is a well known supplier of organic and specialty oils in North America, with its own production in The Netherlands. The acquisition strengthens and diversifies the company's footprint in North America, while bringing a broader portfolio, deep sustainability impact, and West Coast warehousing to Spack customers. In 2019 Spack International was founded to expand distribution of organic and specialty oils produced in its sister company's plant in The Netherlands. Since inception, Spack International has grown into a leading supplier of organic sunflower, canola, and flaxseed oils, among others. The majority of its products are produced in its plant in The Netherlands. As part of the strategic agreement, Spack International's business will be integrated into Cefetra's and the Spack team joins the Cefetra team to continue seamless execution of all Spack business operations.

Spack International CEO Koen Zuyderwijk shares that "Integrating into Cefetra Premium Oils enables us to optimize our distribution network across North America while providing our customers with an expanded product portfolio, enhanced delivery efficiencies, and stronger overall support. We are thrilled to take this next step and join an established leader in agricultural commodities with a heritage dating back to 1899." Scott Slater, President of Cefetra Premium Oils USA said "This strategic agreement and expansion of our team secures supply of top quality sunflower, canola, and flaxseed oils produced by Spack, while increasing our footprint in the Eastern United States and Canada. We're also excited to bring a broader portfolio of avocado, coconut, and other specialty oils to Spack's customers. Along with the broader portfolio we also bring Spack's customers the considerable resources of the Cefetra Group to provide customers with deeper market insights, sustainability benchmarking, reporting, and carbon sequestration opportunities."
